

Videobased Mobile Mapping Solutions

CITY MAPPER

We build things that work

THE WAY YOU WISH THEY WOULD

Based on several years experience with video base mobile mapping, we developed a total solution to support an easy workflow of datacapturing. The citymapper is a roofbox, where GPS/INS, capturing hardware, camera mounting is included. This is a very stable system to maximize production time for capturing.

Standard configuration of GPS/INS and camera position, that can be mounted on the roofrails of your car, will result in a flexible system for several projects.

DATASHEET
version 2.0

KEY FEATURES

Details

Camera	Pointgrey Ladybug 3 or Ladybug 5
GPS/INS	Trimble LV 125, Applanix IMU-69 Applanix Pospac post-processing software
PC	Power PC with Windows 7 and Sync. unit
HRS D-720	1 license Horus Movie Recorder
HMR	1 license Horus Movie Maker
HMP	Horus Movie Player (free to distribute)
Dimensions	124 cm x 25 cm x 36 cm

HORUS TURNKEY SOLUTION

Our implementation team helps you with implementation, also possible at your office location. Support can be delivered by remote internet support. Training for technical and commercial staff is included in the Citymapper solution. A training course of 4 days will help you to see the possibilities of this solution. The first year of maintenance and support on the software is included. The only thing you need to do is turn the key and start recording your projects. That's the Horus solution!

Also included

Configuration	40 hours on site (power supply must be available in the car)
Training	4 days on site (Recording software, Player Software)
Support	First year support Horus Software
Bundle Demo licenses	Layer manager, annotations, orthotool, immersive

Designed to Fit

The Citymapper can be mounted on standard roofrails and is available with both the Ladybug 3 or the Ladybug 5 to fit the needs of your projects.

Advantages

- ▶ Easy to connect
- ▶ No postprocessing of images
- ▶ Low investment Mobile Mapping Solution
- ▶ Implementation and Horus Support
