

Videobased Mobile Mapping Solutions

CITY MAPPER

Videobased Mobile Mapping

in just four simple steps

DATASHEET
version 1.0

Based on several years experience with video base mobile mapping, we developed a total solution to support an easy workflow of datacapturing. The citymapper is a roofrail system, where GPS/INS, capturing hardware, camera mounting is included. This is a very stable system to maximize production time for capturing.

Standard configuration of GPS/INS and camera position, that can be mounted on the roofrails of your car, will result in a flexible system for several projects.

KEY FEATURES

Details

Camera	Pointgrey Ladybug 3, 5 or Ladybug 5+
